

## Custom Printed Products

3M's Environmental, Health and Safety (EHS) Management System helps us address changing customer needs and expectations as we continue to drive sustainable growth.

The EHS Management System:

- Builds on the strengths of our previous environmental, health and safety efforts.
- Includes an integrated, holistic system that anticipates and addresses long term issues and drives continuous improvement.
- Promotes a strategic planning process that integrates EHS issues into the business unit strategic plans.
- Requires each business unit to identify EHS issues, develop formal action plans, set goals and measure results.
- Requires a Life Cycle Management (LCM) review of all new products and of existing products on a prioritized basis.

## The EHS Management System Promotes Sound Environmental Management of Our Facilities Worldwide
